← **To record shipment**

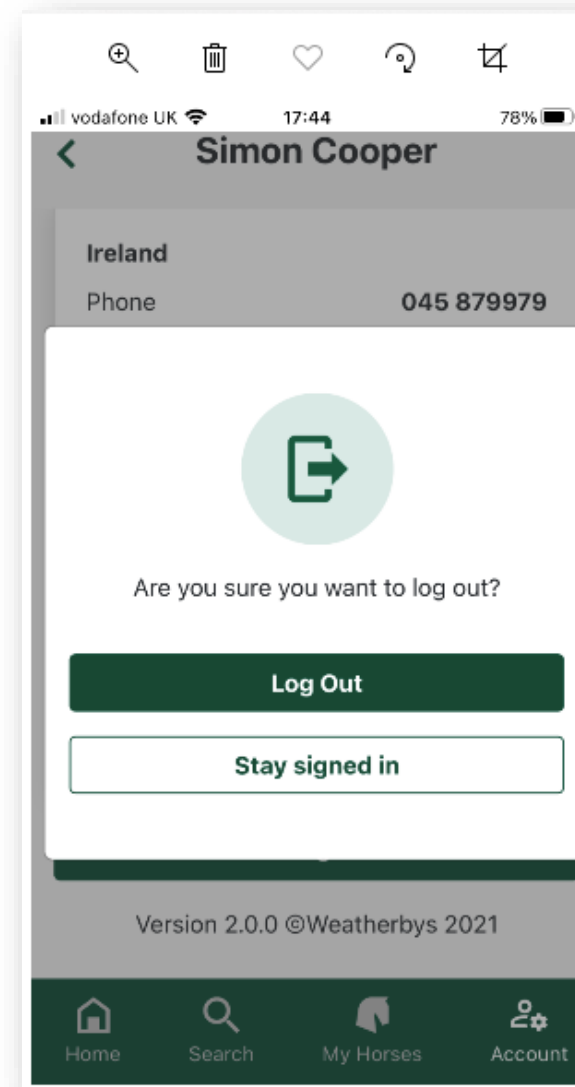

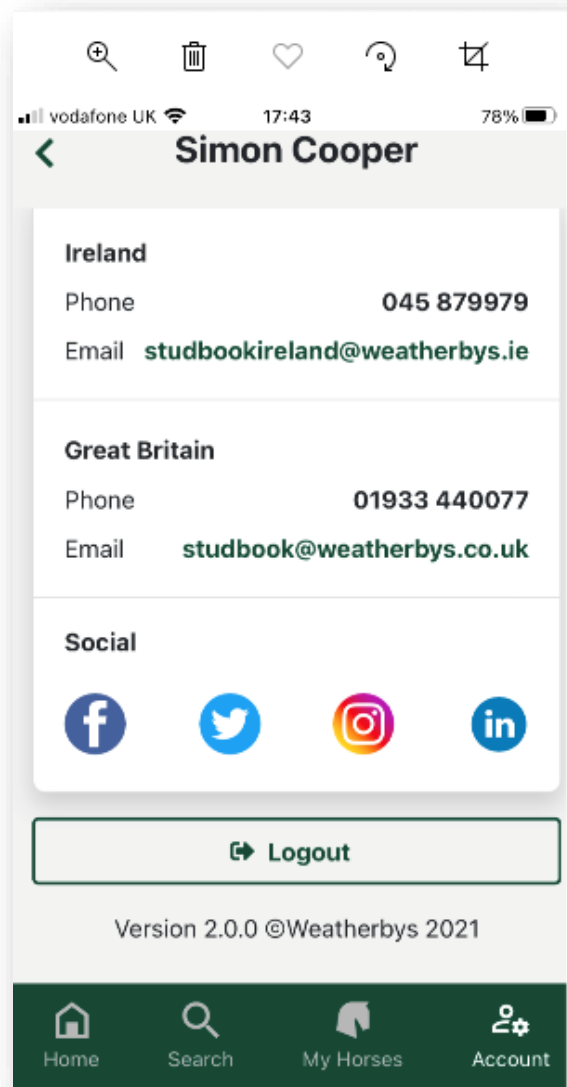

← **GPS Location – Push Notification to update movement history**

## DIGITAL MOVEMENT FLOW

Customs officers, shippers, regulators and vets can check health status, medications and vaccination records, ownership, previous locations and future destinations for the horse online. With the option for preclearance in advance entry or exit from a specific holding or premises all information collected is visible in real time. The geo-location functionality provides key data for interrogation and restricts certain data - for example, health certificates - to be viewed only as complete at border crossings on validation by the respective authorities.
